Ivan Milin P. Eng.
President
EcoSpace Engineering Ltd.
210 Elmhurst Drive
Toronto, ON M9W 2L6

Dear Mr. Milin,

Re.: EcoSpace Engineering Ltd. – Pilot Plant for Processing of Chicken Manure using Fly Larvae
Research Program with University of Guelph – Ron Fleming, Coordinator Environmental
Management Program

Egg Farmers of Ontario supports the research program that EcoSpace and the University of Guelph are submitting for funding.

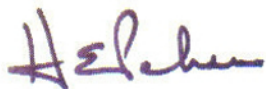

Egg Farmers of Ontario has a continuing interest in the possibilities for the output from the technologies for waste/manure management on which you plan to carry out this fundamental work. Furthering our understanding of the effectiveness of the process and any value added co-product opportunities are potentially of interest to us.

The possibility of producing improved environmental benefits and a valuable output product at an acceptable cost through this study appears promising.

We would like to offer you support for the establishment of a pilot processing facility and in addition, we would like the opportunity to attend management and progress meetings at the facility over the term of the project.

We look forward to hearing that you have been successful in obtaining funding support.

Sincerely,

Harry Pelissero
General Manager
